

LMK 351

Screw-in Transmitter

Ceramic Sensor

accuracy according to IEC 61298-2: standard: 0.35% FSO option: 0.25% FSO

Nominal pressure

from 0 ... 40 mbar up to 0 ... 20 bar

Output signal

2-wire: 4 ... 20 mA others on request

Product characteristics

- pressure port PVDF or PP-HT for aggressive media
- pressure port G 1 1/2" for pasty and polluted media
- diaphragm ceramics Al₂O₃ 99.9 %

Optional versions

- IS-version Ex ia = intrinsically safe for gases and dust
- customer specific versions

The screw-in transmitter LMK 351 has been designed for measuring small system pressure and level measurement in container. The LMK 351 is based on an own-developed capacitive ceramic sensor element. Usage in viscous and pasty media is possible because of the flush mounted sensor.

For the usage in aggressive media a pressure port in PVDF is available. An intrinsically safe version completes the range of possibilities.

Preferred areas of use are

Plant and machine engineering

Environmental engineering (water – sewage – recycling)

Preferred used for

Fuel and oil
